

Welcome to Advanced Eyecare!

Dr. Schachter is happy to welcome you to our office. He has been practicing optometry for over 20 years and is very progressive when it comes to dry eye treatment. Please review our policies and billing information. This information will help you understand your statement and help you make informed decisions about your eyecare. We want you to have a wonderful experience with our practice.

We accept most vision insurance, PPO or POS health insurance (for special testing or treatment with a diagnosis), and health spending accounts. If you have any questions, please ask. We can help you understand your plan.

We offer the following services:

Well vision exam- You will be given a battery of tests by our technician and Dr. Schachter will do a complete health review of your eyes. This exam is always done with a refraction. The fee for a well vision exam is \$149.00

Refraction- This service is done to retrieve your glasses prescription. This is always performed during your well vision exam. The fee for a refraction is \$45.00

iWellness Exam- Our practice has incorporated the iWellnessExam OCT retinal scan and Optomap retinal imaging. The OCT takes a detailed image of the cross section of the retina while the Optomap takes a detailed single image of more than 80% of the retina. Together, these unique technologies can help detect potentially vision threatening and systemic diseases in their very early stages. It is recommended for all patients and is not covered by insurance. The fee for the iWellnessExam is \$49.00

Contact Lens Exam and Management Services - If you currently wear or wish to wear contact lenses, a contact lens exam and fitting is necessary to issue a prescription. This exam must be performed every twelve months and is separate from your well vision exam. The fee for a contact lens exam ranges from \$58 to \$285. This fee includes non-medical contact lens follow up appointments and diagnostic contact lenses as needed.

Cataract Surgery co-management- We work closely with many local surgeons. We can offer post operative care for your cataract surgery.

LASIK co management- We work closely with NVision LASIK center in Newport Beach. We can offer pre and post operative care for refractive surgery.
